

iPhone 5s Screen Replacement

Be very careful with the screws They're really small & When taking off the screen be gentle

Written By: leandro

INTRODUCTION

For the official iFixit guide to replacing your iPhone 5s display, [click here](#). The version you are currently viewing is retained solely for historical purposes.

Step 1 — Unscrewing the screen

- First step is to locate the two screws at the bottom part of the phone . These screws are small be extremely careful

Step 2

- You are going to need these two tools to take off the screen

Step 3 — Lifting the screen off

- Gently Pull the screen up while slowly using the green tool to pry the screen up

Step 4 — Taking the screen off of the phone

- To completely take the screen off the phone, unscrew the four screws keeping the phone

Step 5 — Taking off the home Button

- unscrew these two screws (these screws are VERY SMALL be careful)

To reassemble your device, follow these instructions in reverse order.
